Develop the best National Team!

“ROAD TO INTERNATIONAL CUP” GUIDE

International Cup The long and challenging road to glory. Finally, as the Head Coach of the National Team, you are responsible for developing and motivating your team for the upcoming tournament in the “Road to International Cup” Mode. Use this guide as a reference to help find your own way to develop a team. There is more than just one road to victory.

WELCOME HEAD COACH!

First, select a team from one of the 64 countries that you would like to control. Then enter your name. Enter up to 9 characters with upper and lowercase letters, numbers, and symbols. When you are finished entering, select “Decide” and press the A Button.

You are welcomed by a competent staff who will support you and the team for the next four years. Immediately check the “Schedule” screen to view the dates for the International Cup.

SCHEDULE

In the beginning your team is provided with 2000 points. Manage the Points wisely to arrange an effective schedule.

An extensive period of Overseas Games can surely provide the team with a great opportunity to learn, but this will require many of your points. Arranging an effective schedule does not necessarily mean using more points, but to plan according to the team's current ability. Here is an example of how to build a schedule. Use this as a reference to manage your own schedule.

You can fill in the team's schedule from 4~11 weeks ahead of time. To begin, the first month (April) of the 1st year will be fundamental trainings on the ground and a Training Camp will take place during all four weeks of May.

TRAINING CAMP

First, select the first week of May and press the A Button. Press up or down on the Control Stick / + Control Pad and select "Training Camp" and press the A Button to enter. The length of Training Camp can be adjusted from 4~8 weeks. The points required is based on the number of weeks. First, schedule a Training Camp of 4 weeks to find out any weakness in the team's current ability. For the last day of Training Camp, there is a practice match much like an actual match.

At the same time, arrange the June schedule. Based on the knowledge gained from Training Camp, schedule training and team organization on the ground for the first 3 weeks, then enter a Exhibition Game on the 4th week.

EXHIBITION GAME

Enter conditions of the opposition. Press up or down on the Control Stick / + Control Pad to select an item and left or right on the Control Stick / + Control Pad to change the item. Enter "Apply" with the A Button. "Rank" is selected based on your team's ranking. The opponent's Rank can be set from either "Lower," "Same," or "Upper." This will also determine the basic Points required for the match. "Style" is the characteristic of the opposing team's game. "Used Points" is how many points you will use to enter a match. The higher the points, the more likely a stronger team will take the offer.

By practicing with "Exhibition Game" and "Training Camp," you're building confidence as the Head Coach of the team. Enter a "Overseas Game" to raise your team's motivation.

OVERSEAS GAME

Enter tour requirements and conditions. Press up or down on the Control Stick / + Control Pad to select an item and left or right on the Control Stick / + Control Pad to change the item. Then, enter "Apply" with the A Button.

Select the continental conditions for "Area," 4~8 weeks on "Stay," and also the "Used Points" of the tour. Adjustments in the items above will change your schedule. The teams you will match up against during the tour will be announced each week.

GROUND

Assign an adequate training menu for your players from "GROUND" to improve the skill of the entire team.

With "Ground" you can change a player or formation, similar to the pre game Strategy Screen (see P.9). You will also give detailed training orders to each player through "Training" and adjust the assigned field positions through "Position Area" on the first week of every month.

TRAINING

Press the Control Stick / + Control Pad to select the player you wish to train. Substitute Players and Registered Players are also subject to have their own training menu. Press the A Button when the player is selected to enter. Press up or down on the Control Stick / + Control Pad to select the item when the Training menu is displayed.

INDIVIDUAL SKILL

Stresses the training of one particular ability. Assign training based on the player's physical abilities such as "Quickness" and "Stamina," or skills such as "Dribble," "Shoot," and "Tackle."

POSITION TYPE

Increase the overall abilities and skills of the selected position.

PLAY STYLE

Assign the type of plays the player will be focusing on. Various abilities are combined in the training for "Covering," "Game Maker," and "Striker."

Press the X Button at the "Ground" to display each player's ability gauge. 4 abilities are presented: from the left is Stamina / Ability / Offense ability / Defense ability.

Results of the player's training are indicated by the development mark. When the development mark is big, players have more potential of developing their abilities from training. When the development mark is small, the player is reaching their limit to develop their abilities from training. Frequently check and arrange the Training menu.

SKILL UP

The "Training" menu is a daily repetition of practice. Players can gradually increase their abilities during a time when there are no arrangements in the "Schedule." You can order Training every week during Training Camp from "Ground," so take some time to consider and select your "Training" menu. The players will surely take their training with interests. Also, there is a chance that the players will find their own abilities through their performance against a stronger team or an important match for the team.

POSITION AREA

When you select the "Position Area," a player's assigned field position can be adjusted. Select the player that you would like to adjust and press the A Button. The current position and the Adjustment Bar will be displayed. Press up or down on the Control Stick / + Control Pad to adjust to an offensive position or defensive position and press the A Button to enter.

DATA ROOM

It is necessary to plan for the future. Press up or down on the Control Stick / + Control Pad to select an item and press the A Button to enter. "Preliminary Status" displays the qualifying situation of the International Cup. An assistant will provide you with an advice. "Game History" displays all results for your team. Press up or down on the Control Stick / + Control Pad to select and press the A Button to enter and view the details of each match. Use the data as a reference for your future strategy.

HEADQUARTERS

When all of the orders are given, select "Schedule Update" at the headquarters and proceed with your schedule. The week will automatically pass by when no orders are given, so do not forget to schedule Training or apply for the Training Camp and Overseas Game.

**EVENTS**

As you progress towards the International Cup, occasionally an event will rise. For example, the supporters will get excited from recent home games, or players will get confident about their ability to play after an Overseas Game. The assistant will provide you with this information to call your attention to such announcements.

Also, when your team's world ranking is rated higher from winning a match, an offer for a Exhibition Game from another national team may come to your team. Taking or turning down this offer is entirely up to you, but this opportunity to play can be a great way to motivate your players.

Did you find any hints to strengthen your own team? The world holds many talents. Even from your experience through other modes, the first match of "Road to International Cup" will surely be a challenge.

The team that you developed and have grown to love in this mode can also be used for other modes by entering the team from "Manage Edited Data" (see P.28). Develop your team through hardship and determination and until the day you reach the honorable victory...
