OBJECT OF THE GAME

If you're looking for non-stop action, you've come to the right place! The *Brawl Brothers* delivers a real knockout punch, with enough moves and mayhem to challenge the best you've got to offer. Make the game as easy or as difficult as you like when you choose your options. You can limit the number of lives and continues, even control the number of enemies! Play solo, join forces with a friend, or go head-to-head with your partner in a one-on-one competition. Stick with one character, or take turns with all five...the *Brawl Brothers* lets you do it your way!

You come face-to-face with Dieter's evil forces right from the start — villains with names like Heckler, Phantom, Led Hed, Fnord (huh?) and, of course, Butch. Your adventures take you through four stages, from the Bayside City streets to a labyrinth of underground storm drains, then into the jungle and across the rooftops to the Command Center, where Dieter keeps his secret Air Fortress...a flying battleship worthy of the name. Be prepared to find your way out of a couple of mazes along the way — you'll have to use your brains *and* your fists if you want to survive this one!

Not to worry, though — you've got plenty of talent to choose from. The *Brawl Brothers* are actually five guys...or four guys and a girl, to be exact. Each character has their own distinct personality and moves, from jabs and body slams to flying kicks and pile drivers. Hack is the mastermind of the operation — but he still throws a mean punch! Slash, his best buddy, is the enforcer of the group — a real heavy-hitter. Kazan is a ninja fighter with special powers. Lord J. is a world-class judo master and black belt in karate. And last but not least, there's Wendy — a pro-wrestler with awesome power...for a girl, that is!

You choose two characters at the beginning of the game — your main character and a backup. The other three are kidnapped by Dieter and his gang of thugs, who use them to create clones — evil twins with super-human strength. Your final confrontation on each stage is a fight to the finish with one of these clones — and believe me, they only look like your friends! Once you defeat the clone, your friend is set free and can be chosen for the next round. Dieter himself appears at the end of the final stage as he tries to make his escape in the Air Fortress.

You arrive just in time, crawling over the wing and into the hatch as the massive flying fortress gets airborne. Your mission is clear — you've gotta find Dieter, then survive the final battle and escape before he blows the whole thing sky high...hey, if he's going down, he's gonna take you with him! With all this to look forward to, we think you'll agree that the *Brawl Brothers* clobbers the competition...and keeps you coming back for more. So what are you waiting for? Pick a player and get into the action!

GETTING STARTED

1. Place the *Brawl Brothers* Game Pak into your Super NES™ and turn on the unit.
2. The title screen appears.
3. Press **START** to begin the game.
4. The *Brawl Brothers* includes three play modes: 1 Player, 2 Player, and Player versus Player (VS MODE on the menu screen).

Select **OPTION MODE** to choose your options[†] before beginning the game, including the number of Lives, number of Continues, and Difficulty Level. Use the Control Pad to select an option, then press any button.

One-Player Game

Choose **1 Player Game** from the menu screen. When the SELECT PLAYER screen appears, use the Control Pad to position the cursor over a character and press the **Y Button**. Next, you must select a second, "backup" character. If you lose all of your lives and choose to continue the game, you will have the option of switching to the backup character at that time. Also, if a second player joins the game (by pressing **START** on Controller 2), they will control this character. After you choose a second character, the map screen appears. Press any button to begin.

Two-Player Game

Choose **2 Player Game** from the menu screen. The SELECT PLAYER screen appears. Player 1 uses the red icon. Player 2 uses the blue icon. Press **Left** or **Right** on your Control Pad to select a character, then press the **Y Button** to confirm your selection (the icon will start to flash). Each player must choose a different character. Note that a second player may join a One-Player game at any time by pressing **START** on Controller 2. When both players have selected a character, the map screen appears. Press any button to begin.

Player Versus Player

Choose **VS MODE** from the menu screen. When the SELECT

PLAYER screen appears, each player chooses a different character. Confront your opponent in three rounds of head-to-head competition. The first player to win two rounds is the champion.

The OPTIONS Screen

Choose **OPTION MODE** on the menu screen to display the **OPTIONS** screen.

Press **Up** or **Down** on the Control Pad to select an option, then press **Left** or **Right** on the Control Pad to change that option. When you have finished choosing your options, select **EXIT** and press any button to return to the title screen. Option changes are not saved, so you will need to set the options each time you turn on your Super NES.

ON-SCREEN DISPLAYS

Energy Meter

Player One's energy meter appears in the upper left corner of the screen, beneath the name of the character. You lose energy each time you are hit. When your energy runs out, you lose a life. In a Two Player game, Player Two's energy meter and other information appear in the upper right corner of the screen. During combat with an enemy, that enemy's name, energy meter, and character icon appear beneath your own.

Lives

The number of lives remaining (in addition to the current life) is displayed above the Energy Meter, next to the character's name. When your Energy Meter runs out, you lose a life. Normally, you begin each game with three extra lives. You may change this number on the OPTIONS screen if you wish. When you lose a life, a

character icon drops down automatically. Use the Control Pad to position this icon, then press **START** to begin.

Angry Mode

Your character switches into Angry Mode when he comes under heavy attack. You'll know when it happens — he starts flashing. In Angry Mode, you are more powerful and cannot be hurt by your opponents. Unfortunately, Angry Mode only lasts for a limited amount of time. You can turn this option on or off on the OPTIONS screen.

Continues

In a One-Player game, the number of Continues appears on the top of the screen, across from your character's Energy Meter. Normally, you begin the game with three Continues. You may change this number on the OPTIONS screen if you wish. After losing your last life, simply press **START** before the countdown timer reaches "0" to continue the game.

When you continue a game, you may keep the same character or switch to your "backup" character. Once you rescue one of your friends (by defeating the clone at the end of a stage), you may select that character as well. To change characters, press **Left** or **Right** on the Control Pad. The picture at the top of the screen changes to show which character you are choosing. When you press **START**, a character icon drops down automatically. Use the Control Pad to position this icon, then press **START** again to begin.

Joining the Action

During a One-Player game, you will see the words "PRESS START" flashing in the upper right corner of the screen. This indicates that a second player can join the action simply by pressing **START** on Controller 2. Once a second player presses **START**, a picture of the "backup" character appears on the right side of the screen. If other characters are available, you may change characters by pressing **Left**

or **Right** on the Control Pad. When you press **START**, a character icon drops down automatically. Use the Control Pad to position this icon, then press **START** again to begin.

SCORING

You get one point for each enemy you defeat. Your Stage Score and Total Score appear at the end of every stage.

THE STAGES

The *Brawl Brothers* includes four multi-level stages and a non-stop supply of no-good, vicious villains. These stages are:

Stage 1

Your friends have been kidnapped by that wacko dude Dieter...and you're not gonna take it! Your search begins on the streets of Bayside City, but Dieter's thugs are there before you. Trash the slimeballs, then move on to the Bayside Bridge. They keep comin' at you, on foot and even in a helicopter! Dodge the machine gun fire (at

least his guys get it too), then drop to the storm drains as the bridge collapses. More enemies are lurking down below in the maze of tunnels...if you're not careful, you could be stuck down here for hours. Find the exit ladder, then climb up and face your first big showdown with one of Dieter's evil clones.

Stage 2

Well, you survived the first challenge and rescued one of your friends... now it's time to continue your search for the others. You head into the jungle — but the path is full of land mines! Explode the mines by throwing your enemies on top of them...if you don't land on them first, that is. At the end of the path, a moving platform takes you up, up, up — all the way to the top of Dieter's training complex. He's using the place as a staging area for his attack helicopters and rocket launchers...and the guards aren't exactly happy to see you! Fight your way to the end of the complex, then destroy the Super 'Copter before your next "friend" shows up.

Stage 3

Another victory! No doubt about it, you've got what it takes. With just one friend left to rescue, you head across the rooftops in search of Dieter's Command Center. Better watch your footing as you move from building to building...it's a long way down. At last you find it — the main headquarters! Dieter didn't provide a floor plan, so you'll have to find your way around the building yourself. Move from one elevator to another as you travel from floor to floor in search of your kidnapped friend. Unfortunately, their clone appears first. Crush the scum bag before they do the same to you. Now all your friends are safe...but where is Dieter?

Stage 4

It looks like Dieter heard you coming and decided to make his escape in the Air Fortress — a huge flying battleship. You jump onto the tail as the airship takes off, then fight your way across the wing to the

entry hatch. Inside, more enemies come at you in a final, furious defense of their evil boss. At last...the moment you've been waiting for...it's Dieter himself! Hey, wait a minute — this guy doesn't look so tough. Of course, looks can be deceiving...as you soon find out. Dieter eventually goes down in defeat, but he's got one last trick up his sleeve — the auto-destruct sequence! Don't worry, I'm sure you'll find a way out of this one...
