MUSEUM**

Use your Joystick Controllers with this ATARI® game. Be sure the controllers are firmly plugged into the **LEFT** and **RIGHT CONTROLLER** jacks at the rear of your ATARI® system. Hold the controller with the red button to your upper left toward the television screen.

Extra Terrestrials is a two-player game only, therefore two joysticks are required.

NOTE: Always turn the console power switch OFF when inserting or removing the game program. This will protect the electronic components and prolong the life of your ATARI® Video Computer System.

GETTING STARTED

Extra Terrestrials have landed on our planet! The player who uses the **LEFT CONTROLLER** will control the first alien who is looking for his friend, who cannot be seen to the naked eye. You may choose from up to four different aliens by pressing the **SELECT** button on your ATARI® to choose from the following aliens, then press **RESET** to start the game.

The player who uses the **RIGHT CONTROLLER** will move the Ranger, who is seeking out the Extra Terrestrials who have landed on our planet.

OBJECT OF THE GAME

The object of the game is for the player using the **LEFT CONTROLLER** to find his invisible friend and eat the candy that he is dropping to increase the game score while avoiding the ranger. Meeting up with your invisible friend will result in a victory song being played.

The object of the game for the player using the **RIGHT CONTROLLER** is to capture the Extra Terrestrials by touching them while moving in four different directions, as quickly as possible.
